

Rick,

Just a note to tell you how pleased we are with the Tomcat "Edge" Oscillating Stick Scrubber/Stripper and "Minimag" Automatic scrubbers.

They do an amazing job of prepping our VCT and Terrazzo floor for finishing and refinishing.

We do not burnish our finished floors for a variety of reasons and have opted instead on a scrub and recoat system that has the potential of requiring a lot of floor finish. With your equipment however, we have such precise control, that we can remove and replace just the soiled finish while preserving base coats and unsoiled edges and corners. We merely clean what is dirty and replace any removed finish without concern for unsightly build up.

We use high performance pads that are designed for either wet or dry stripping and use the appropriate process suited to any of a variety of conditions.

All that and the added utility of being able to accomplish routine daily aisle cleaning with the Minimag!

Keep the innovations coming.

Thank you,
Doug Coleman
